ABSTRACT

Trends in overall college enrollments and in Black and Hispanic enrollments in the nation and in the South in 1980 are examined, based on data from National Center for Education Statistics' surveys. Attention is also directed to enrollment by type of institution, enrollment in selected fields, enrollment trends during 1976-1980, enrollment in predominantly and traditionally Black colleges and universities, and enrollment in predominantly Hispanic colleges and universities. Highlights include the following nationwide: (1) total enrollment increased 10 percent from 1976 to 1980 (Black ernollment increased 7 percent and Hispanic, 26 percent); (2) enrollment rose 12 percent at the undergraduate level (Black enrollment grew 8 percent and Hispanic, 25 percent); (3) part-time total enrollment increased 16 percent (part-time Black enrollment grew 13 percent; part-time Hispanic, 32 percent). In the Southern Regional Education Board states, total enrollment grew 12 percent (Black--8 percent, Hispanic--32 percent); Blacks comprised 14.6 percent of the students enrolled in Southern colleges and universities; Hispanics were 4.1 percent of enrollment, with Florida and Texas accounting for 90 percent of that enrollment; part-time enrollment in the Southern region grew 21 percent in the 4-year 1976-1980 period; part-time Black and Hispanic enrollment increased 19 and 43 percent, respectively; and in the South, the growth rates for total, Black and Hispanic undergraduate, first-professional, and graduate enrollment were slightly higher, for the most part, than the national figures. HIGHLIGHTS

- Total enrollment in the United States grew to 12.2 million in 1980, an increase of 10 percent from 1976.

- Black enrollment in the United States increased 7 percent from 1976 to 1980. In 1980, blacks constituted about 11.7 percent of the total population of the United States and 9.1 percent of the students enrolled in institutions of higher education.

- Hispanic enrollment increased 26 percent, nationally, from 1976 to 1980. Hispanics comprised approximately 7.7 percent of the total population and 4.9 percent of all students in higher education in the United States and its territories in 1980.

- At the undergraduate level, enrollment rose 12 percent, nationally, from 1976 to 1980; black enrollment grew 8 percent; and Hispanic enrollment increased 25 percent. At the first professional level, total, black, and Hispanic enrollment showed gains of 14, 16, and 40 percent, respectively. At the graduate level, total enrollment rose 1 percent, black enrollment declined 4 percent, and Hispanic enrollment increased 24 percent in 1976-1980.

- Part-time total enrollment increased 16 percent during the 1976-1980 period, while part-time black enrollment grew 13 percent and part-time Hispanic enrollment gained 32 percent. Full-time enrollment growth was less for each group.

- In the SREB states, total enrollment grew 12 percent from 1976 to 1980, black enrollment grew 8 percent, and Hispanic enrollment gained 32 percent. The black population comprised 18.7 percent of the total population in 1980, and 14.6 percent of the students enrolled in Southern colleges and universities were black. Hispanics were 6.2 percent of the population and 4.1 percent of enrollment--Florida and Texas accounted for 90 percent of that enrollment.

- Part-time enrollment in the Southern region grew 21 percent in the four-year 1976-1980 period; part-time black and Hispanic enrollment increased 19 and 43 percent, respectively. Part-time enrollment growth far exceeded full-time enrollment increases for each group.

- In the South, the growth rates for total, black, and Hispanic undergraduate, first professional, and graduate enrollment were slightly higher, for the most part, than the national figures.

- In the South, the 96 traditionally black institutions, public and private, enrolled 24 percent of the 461,000 black students in the Southern region in 1980.

- Black enrollment in predominantly white colleges and universities in the South grew from 98,000 in 1970 to 287,000 in 1980, an increase of 193 percent.

FOREWORD

The biennial fall enrollment and compliance surveys which have been conducted by the National Center for Education Statistics since 1976 provide an accurate accounting of college enrollments by race and ethnic breakdowns. The SREB reports which have been derived from these surveys facilitate the tracking, by each state, of its progress in opening up higher educational opportunity at all levels to all citizens.

By 1976, the black population, which is the most widely distributed minority in the Southern states, had forged far beyond its level of participation in higher education in the early 1960s when the massive expansion of general college attendance began. Black enrollment in the SREB states has continued to grow since 1976 (5.9 percent in four years) but not as rapidly as total enrollment (8.9 percent). Thus, black college participation has essentially reached a plateau--in 1976, the share of SREB-state enrollment was 15.1 percent black, and in 1980, the percentage is reported as 14.6. Meanwhile, the surge in Hispanic enrollment, which began later than the expansion of black participation, has continued in several states.

The issue of access versus quality in higher education has been resolved from time to time with varying balances in emphasis upon those two essential considerations. While many states are now tending to consolidate the access gains of the recent past by renewed concerns for quality, they must continue to be mindful of lingering differentials in the degree to which all their citizens are afforded entree to higher educational opportunity. It is a challenge shared by educational leadership, both within the predominantly black institutions which now account for 38 percent of black enrollment in the South, and the 800 other colleges and universities which have an ever-increasing responsibility in this regard.

Winfred L. Godwin

ENROLLMENT IN HIGHER EDUCATION, 1976-1980

Enrollment in higher education grew rapidly in the 1960s. Campuses were flooded with students as the "baby boom" generation reached college age. Federal initiatives increased educational opportunity, and colleges and universities welcomed poor and minority students in unprecedented numbers. As more people attended college, educational expectations rose. Educational credentials were thought to be the stepping-stone to the "good life"--economic prosperity and social mobility.

In 1976, the Higher Education General Information Survey (HEGIS) of fall enrollment for the first time collected data that showed the distribution of minority students in the total enrollment. Subsequent fall enrollment and biennial compliance surveys in 1978 and 1980 have updated the 1976 data and provide a basis for examining recent trends in total and minority enrollment. This information provides the most comprehensive description of minority participation in higher education currently available.

Three views of enrollment for the 1976 to 1980 period are presented below. "Total" enrollment describes trends for all students enrolled in colleges and universities, and provides a background for considering minority enrollment data. The sections on black and Hispanic enrollment describe trends for these two minority groups.

Trends in Total Enrollment

In the United States, higher education enrollment rebounded from somewhat slow growth (2.4 percent) in the 1976-1978 period to an enrollment growth rate of 7.4 percent from 1978 to 1980. About 11.1 million students were enrolled in colleges and universities in 1976; total enrollment rose to 11.4 million in 1978 and to 12.2 million in 1980 (Table A).

Part-time enrollment, which has averaged about 40 percent of total enrollment in recent years, grew at a steady rate from 1976 to 1980. Full-time enrollment growth, however, varied considerably--from 1976 to 1978 there was no increase, while from 1978 to 1980 full-time enrollment grew 6.4 percent. Full-time-equivalent (FTE) enrollment showed almost no growth in 1976-1978 and a 6.9 percent increase from 1978 to 1980.

Table A[1]

TOTAL ENROLLMENT BY ENROLLMENT STATUS, 1976, 1978, 1980; PERCENT CHANGE 1976-1978, 1978-1980, UNITED STATES AND SREB STATES

Total	2,826,162	2,963,663	3,157,093	4.9	6.5
FTE	2,191,700	2,246,271	2,386,901	2.5	6.3

[1] Note on Sources: The tables in this report, unless noted otherwise, were derived from special tabulations of tapes from the National Center for Education Statistics (NCES) Higher Education General Information Survey (HEGIS) of fall enrollments in 1976, 1978, and 1980. The sums of racial and ethnic breakdowns may not equal totals due to the failure of some institutions to report data by race and ethnicity. Also, the sums of the breakdowns by level may not equal the grand totals, due to non-reporting by a small number of institutions.

[2] Full-time-equivalent (FTE) enrollment, which is not included in the HEGIS enrollment data, was calculated by adding full-time enrollment with a factor (0.344) of part-time enrollment. FTE enrollment figures are used in many funding formulas.

In the SREB states, enrollment totaled 2.8 million students in 1976, 3 million in 1978, and almost 3.2 million in 1980, showing a growth rate of 4.9 percent for 1976-1978 and 6.5 percent for 1978-1980. The components of enrollment growth paralleled the national trends: part-time enrollment increased 13.1 percent in 1976-1978 and 7.4 percent in 1978-1980; full-time enrollment remained stable for the 1976-1978 period and rose 6 percent from 1978-1980. FTE enrollment grew slightly (2.5 percent) from 1976 to 1978, increasing to a 6.3 percent growth rate in 1978-1980.

Several factors may explain the increased rise in enrollment from 1978 to 1980, compared to 1976-1978. Although the number of 18-year-olds is now declining, the largest group of 18-year-olds the nation has ever had were among the students entering college in 1979, which probably contributed substantially to the jump in full-time enrollment--"traditional" college-age students generally attend college on a full-time basis.

Access to higher education for many students is determined by their ability to pay student charges (tuition, fees, room, and board). From 1970 to 1980, student charges doubled, but so did median family income. Student financial aid, which has played an important role in helping poor students pay for college, has been funded for the most part by federal programs designed to promote student access. Federal funds for loans, grants, and college work-study totaled $2.4 billion in 1975 and rose to $4.5 billion in 1980. State student financial aid programs were also growing--awarding $500 million in 1975 and $912 million in 1980.

In 1978, Congress passed the Middle Income Student Assistance Act (MISAA). The MISAA liberalized eligibility for Basic Educational Opportunity (Pell) Grants and gave all students potential access to loans from private banks and other sources that were subsidized and guaranteed against default by the federal government. MISAA removed the income limitation (previously only students from families with under $25,000 income were eligible) so that <u>any</u> student attending college at least half-time

could borrow up to $2,500 on quite lenient terms. Prior to 1978, about one million students borrowed under the Guaranteed Student Loan Program; by 1980, 2.5 million students were taking advantage of the program.

The economic recession of 1974-1975 and the downturn in the economy in 1979-1980 distorted enrollment growth. Full-time enrollment showed substantial growth from 1975 to 1976 and from 1979 to 1980, immediately following the recessionary periods. Part-time enrollment growth was somewhat higher during these periods. After each jump in enrollment, a subsequent lag in both full-time and part-time enrollment growth occurred. Apparently, as the unemployment rate increases in a tight job market, some unemployed persons go to college. For the unemployed, to attend college does not entail a sacrifice of income and they can readily devote time and energy to academic studies that may increase their employability. Also, employed persons, who are competing for promotions and advancement, may enroll part-time to update and upgrade their training.

Women are more likely to go to college now than in the past. In 1979, the number of women enrolled in higher education exceeded the enrollment of men for the first time. More women in the 18-to-24 age group are choosing careers over the traditional homemaker role, and these women are attending college to obtain an education that will give them credentials to enter the job market.

The steady growth of part-time enrollment is one indication of the increasing participation of nontraditional students in higher education. The expansion of evening programs, adult education, extension courses, and continuing education have made higher education available to people who cannot attend traditional programs. Open-door admissions policies have extended educational opportunities to students who were once excluded from higher education. As the number of 18-to-24-year-olds declines, many colleges and universities will continue to expand their educational programs to attract nontraditional students interested in more education.

Nationally, undergraduate, first professional, and graduate enrollment all grew much more in the 1978-1980 period than in the previous two years (Table B). In 1980, 39 percent of the undergraduates enrolled were part-time students, as were 10 percent of the first professional students and 64 percent of the graduate students.

Table B

TOTAL ENROLLMENT BY LEVEL, 1976, 1978, 1980;
PERCENT CHANGE 1976-1978, 1978-1980,
UNITED STATES AND SREB STATES

	1976	1978	1980	Percent Change 1976-1978	Percent Change 1978-1980
United States					
Undergraduate	9,532,914	9,808,815	10,603,579	2.9%	8.1%
First Professional	245,913	258,496	279,797	5.1	8.2
Graduate	1,338,586	1,324,587	1,351,268	-1.0	2.0
Total	11,121,426	11,391,950	12,234,644	2.4	7.4
SREB States					
Undergraduate	2,447,030	2,571,550	2,751,714	5.1	7.0
First Professional	58,304	63,724	71,879	9.3	12.8
Graduate	318,702	328,389	333,500	3.0	1.6
Total	2,826,162	2,963,663	3,157,093	4.9	6.5

In the South, enrollment growth at the three levels in the 1976-1978 and 1978-1980 periods was more consistent. In 1980, 32 percent of undergraduates, 6 percent of first professional students, and 65 percent of graduate students were enrolled as part-time students. Enrollment at the three levels for the United States and each of the SREB states is shown in Table C.

Institutional Perspectives

Enrollment trends by type of institution are depicted in Table D. Of the 12.2 million college students enrolled in 1980 in the United States, 42 percent attended public four-year

institutions, which had little enrollment growth in the 1976-1978 and 1978-1980 periods. Public two-year institutions, accounting for 36 percent of the 1980 enrollment, registered significant growth in both 1976-1978 and 1978-1980.

Table C

TOTAL ENROLLMENT BY LEVEL, ALL INSTITUTIONS, FALL 1980, UNITED STATES AND SREB STATES

	Total	Under-graduate	First Professional	Graduate
United States	12,234,644	10,603,579	279,797	1,351,268

SREB States	3,157,093	100.0	0.6	13.1	4.9	6.0	7.4	6.5
Public Four-Year	1,609,680	51.0	1.4	4.7	2.3	4.7	4.4	4.6
Public Two-Year	1,035,820	32.8	-6.0	21.9	8.3	8.0	9.4	8.8
Private Four-Year	452,960	14.3	2.8	4.5	3.1	5.2	11.0	6.4
Private Two-Year	58,633	1.9	48.6	98.3	55.0	29.4	-0.4	24.5

Private four-year institutions, which enroll 21 percent of all students in higher education, had modest enrollment gains from 1976 to 1980. The category of private two-year institutions, which accounts for only 2 percent of the students in higher education, recorded a tremendous gain due largely to a large increase in the number of proprietary schools. The same general trends were evident in the SREB states.

The need for educational upgrading and updating has reinforced the growth of part-time enrollment, especially at two-year institutions. Community colleges and proprietary schools offer programs that are geared to local needs and job markets. Urban four-year institutions have also attracted part-time students with evening classes for undergraduate and graduate programs.

Total Enrollment in Selected Fields

Enrollment data for several fields of study that have particular interest in terms of minority participation were collected in 1976, 1978, and 1980. Total enrollment in four of the six undergraduate fields surveyed increased nationally and regionally from 1976 to 1980 and dropped in two fields--agriculture and natural resources and the biological sciences (Table E). In the 10 graduate and first professional fields surveyed, total enrollment increased nationally and regionally in all but three fields--architecture and environmental design, biological sciences, and law.

Graduate enrollment growth has slowed greatly in recent years, compared to the 1965-1975 period. The career opportunities for advanced degree recipients in the humanities, the social sciences, and education are limited--the job market appears to be saturated. Most of the growth among post-baccalaureate fields has occurred in business and management and in the first professional fields. The recent (although now slowing) marketability of the MBA (Master's in Business Administration) degree has accounted for much of graduate level enrollment growth. Most urban universities have part-time and evening MBA programs.

The job market has had a major influence on student decision making and fields of study at the undergraduate level. Business and management majors have generally had success in finding employment upon graduation. Developments in the high technology industries have accounted for much of the rapid growth in engineering.

Table E

In contrast to undergraduate trends, graduate enrollment in engineering has not increased greatly in recent years. Because of the strong market demand for engineers they have little incentive to forego lucrative employment opportunities for graduate study. The long-term effects of these trends on engineering faculty and their research activities are a concern at many universities. Advances in high technology, which stimulate much-needed economic growth, may be threatened if engineering schools cannot find and retain qualified faculty.

Black and Hispanic Enrollment

Fall enrollment in higher education in 1980, proportionately by racial/ethnic background and level, is shown in Table F. About 12.2 million people were enrolled in higher education in the United States, of which 9.1 percent were black and 4.9 percent were Hispanic. In the SREB states, 14.6 and 4.2 percent of the 3.2 million students enrolled were black and Hispanic, respectively.

Table F

DISTRIBUTION OF ENROLLMENT BY RACE OR ETHNIC BACKGROUND AND LEVEL, 1980, UNITED STATES AND SREB STATES

	Percent			
	Black	Hispanic	White	Other
United States				
Undergraduate	9.6%	5.2%	80.0%	5.1%
First Professional	4.6	3.1	88.7	3.7
Graduate	5.6	2.9	81.9	9.6
Total	9.1	4.9	80.4	5.6
SREB States				
Undergraduate	15.5	4.4	76.7	3.4
First Professional	5.7	2.2	90.2	1.9
Graduate	9.3	2.6	81.0	7.2
Total	14.6	4.2	77.5	3.8

In the United States and in the SREB states, larger proportions of black and Hispanic students were enrolled at the undergraduate level than at the first professional and graduate levels. Compared to the United States, proportionately more blacks and slightly fewer Hispanics were enrolled in the SREB states.

Data collected by Alexander Astin for the 1982 publication Minorities in American Higher Education depicts the educational system as a "pipeline" leading to positions of leadership and influence in society. At five major "leakage " points, as shown in Table G, disproportionately large numbers of minority-group members drop out of the pipeline. The Astin data emphasize that minorities drop out of high school at a rate that is substantially higher than the dropout rate for whites--more than a quarter of the blacks and almost half of the Hispanics never finish high school. From the data in Table G, it can be shown that about 46, 40, and 42 percent of the white, black, and Hispanic high school graduates, respectively, enter college. The Astin data suggest that attrition from high school is a major problem that handicaps many minority youth.

Table G

PERSISTENCE IN HIGHER EDUCATION
BY RACIAL OR ETHNIC GROUP

	Percentage of Population Who:				
	Complete High School	Enter College	Complete Four-Year Degree	Enter Graduate or Professional School	Complete Graduate or Professional School
Whites	83%	38%	23%	14%	8%
Blacks	72	29	12	8	4
Hispanics	55	23	7	4	2

Source: Adapted from Alexander W. Astin, Minorities in American Higher Education (San Francisco: Jossey-Bass Publishers, 1982).

Comparing the proportion of students entering college with those completing college reveals that 61 percent of the whites, 41 percent of the blacks, and 30 percent of the Hispanics who enroll in college actually complete a four-year college degree. Blacks and Hispanics are increasingly underrepresented at each successive transition point in the postsecondary educational system and Hispanics are the most underrepresented minority group due to their extremely high rate of attrition from secondary school and their greater-than-average attrition rate from undergraduate college.

Lack of money undoubtedly influences the college-going behavior of many black and Hispanic students. In 1975, the median income for white families was 104 percent of the median income for all families ($13,719); median incomes for black and Hispanic families were 64 and 70 percent, respectively. In 1980, median income for all families had risen to $21,023 but the median for blacks had fallen to 60 percent, in relative terms, with whites and Hispanics remaining at the same level.

Trends In Black Enrollment

Total black enrollment in the United States grew to 1.1 million in the fall of 1980, an increase of 4.9 percent from 1978. Table H shows that the increase, paralleling the trend in total enrollment, was more than twice as great as the 1976 to 1978 change of 2.1 percent. Full-time black enrollment, which had declined nearly 1 percent from 1976 to 1978, grew 4.8 percent from 1978 to 1980. Part-time black enrollment slowed slightly, from a growth rate of 7 percent in 1976-1978 to one of 5.2 percent in 1978-1980. The increases in full-time-equivalent (FTE) black enrollment were slightly lower than the increases in total black enrollment. Black enrollment grew somewhat more slowly than total enrollment (Tables A and H).

Table H

Part-Time	375,083	401,360	422,245	7.0	5.2
Total	1,034,680	1,055,964	1,108,043	2.1	4.9
FTE	788,626	792,672	831,050	0.5	4.8
SREB States					
Full-Time	309,080	307,532	321,978	0.5	4.7
Part-Time	116,500	134,941	139,074	15.8	3.1
Total	425,580	442,473	461,052	4.0	4.2
FTE	349,156	353,952	369,819	1.4	4.5

In the SREB states, black full-time enrollment paralleled the United States trend. Part-time black enrollment growth slowed much more sharply in the South, however--from a 15.8 percent increase in the earlier period to a 3.1 percent rate from 1978 to 1980. The slowdown in part-time black enrollment contributed to the lag in black total enrollment growth in the SREB states, which was slightly less than the national rate. FTE black enrollment increased less than black total enrollment in 1976-1978 and more in 1978-1980.

Black enrollment had increased about 277 percent from 1966 to 1976--almost 28 percent a year. The Civil Rights Act of 1964 and the Higher Education Act of 1965 contributed greatly to this growth. In addition, the high school graduation rate of blacks rose significantly in the 1960s and early 1970s. Why did black enrollment grow more slowly than total enrollment from 1976 to 1980? Perhaps fewer black

students could afford to go to college as the median income of black families declined, in relative terms. The student financial aid amendments which were passed in 1978 provided extra funding for middle-income students, which helped many more white students than black students and, therefore, boosted total enrollment. Also, some observers suggest that colleges and universities may have deemphasized minority recruitment in the late 1970s.

Black enrollment in the United States increased at the undergraduate and first professional levels and decreased at the graduate level from 1976 to 1980 (Table I). From 1976 to 1978, black enrollment at the undergraduate and first professional levels grew slightly, and declined at the graduate level. From 1978 to 1980, the trends became more pronounced: the rate of growth for undergraduates more than doubled the previous rate, first professional enrollment grew more than five times the rate of the 1976-1978 period, and graduate enrollment continued to decline. Except for first professional enrollment in 1978-1980, black enrollment increased at a slower rate than total enrollment (Tables B and I).

Table I

Graduate	78,508	76,481	75,151	- 2.6	-1.7
Total	1,034,680	1,055,964	1,108,043	2.1	4.9
SREB States					
Undergraduate	390,899	407,545	426,197	4.3	4.6
First Professional	3,170	3,420	4,050	7.9	18.4
Graduate	31,511	31,508	30,805	0.0	-2.2
Total	425,580	442,473	461,052	4.0	4.2

Black enrollment in the SREB states almost duplicated the national trends, with slightly greater growth overall--except at the undergraduate level in 1978-1980. The increase in black first professional enrollment from 1978 to 1980 in the South exceeded that of total first professional enrollment--otherwise, the growth rate for total enrollment was slightly higher than for black enrollment.

The four-year decline in black graduate enrollment may be related to perceptions of career opportunities. Openings for teachers--except in math and science--are scarce, and teacher education is the graduate field of study in which traditionally most black students have been enrolled. The large rise in black first professional enrollment in 1978-1980 may have resulted from black graduate students selecting first professional programs over graduate programs. At the same time, recruitment of black students by graduate programs in many fields has lost momentum.

Black enrollment is described in greater detail in Table J. In the United States, 9.1 percent of all students enrolled in higher education were black, whereas 11.7 percent of the population as a whole is black. In the SREB region, 14.6 percent of the students were black, as is 18.7 percent of the population. Thus, compared to the total population, blacks generally are underrepresented in higher education, particularly in first professional and graduate programs.

Institutional Perspectives

Enrollment data describing the types of institutions students attend offers another perspective on the status of black educational progress. Black enrollment data by type of institution for fall 1980 shows that the proportion of blacks attending public institutions was slightly greater than average (Tables D and K). Of the 1.1 million blacks enrolled in higher education in the United States in 1980, 40 percent were in public four-year institutions, 39.5 percent were in public two-year institutions, and 17 percent were in private four-year institutions (Table K).

In the SREB states, black enrollment was even more concentrated in public four-year institutions in 1980. More than 47 percent of the 461,000 blacks enrolled in higher education attended public four-year institutions, compared to 34 percent for public two-year colleges and 15 percent for private four-year institutions.

In the last three decades, black enrollment in higher education in the South has undergone many substantial changes. Since 1952, when all of the 63,000 black

students in the South were enrolled in traditionally black institutions, black enrollment has risen to 461,000 in 1980--an increase of 632 percent--with 62 percent of the black students enrolled in predominantly white institutions (Table L).

Traditionally black colleges and universities were founded to educate blacks during the time that the higher education system was racially segregated. Predominantly black institutions, on the other hand, are colleges and universities in which more than 50 percent of the students are black. Traditionally and predominantly black institutions are listed in Appendix A.

Black enrollment has continued to shift from traditionally black institutions to predominantly white institutions in recent years. In 1980, traditionally black institutions in the United States enrolled about 16 percent of all black college students, two-thirds of whom attended traditionally black public institutions. In the SREB states, 34 percent of total black enrollment was registered in traditionally black institutions, with more than two-thirds in traditionally black public institutions.

Minority access to the most prestigious and influential public institutions--the state flagship universities--was examined in Astin's Minorities in American Higher Education. Minority representation was determined by comparing the percentage of minority undergraduate enrollment in the institution with the total minority enrollment in institutions throughout the state. From an analysis of 65 flagship universities, Astin found that blacks were overrepresented at six institutions, proportionately represented at three, and underrepresented at 56. The 14 flagship universities with the greatest degree of underrepresentation of blacks in the undergraduate student body are all in the South, where 96 of the 105 traditionally black institutions are located. The large number of black students (155,000 in 1980) enrolled in these institutions contributes to the underrepresentation of blacks at other colleges and universities in the South.

Table L

BLACK ENROLLMENT IN THE SOUTH,
1952-1980

	Total	Predominantly White Institutions	Predominantly Black Institutions	Black as a Percent of Total Enrollment in the South	Percent of Black Enrollment in Predominantly Black Institutions	Black Enrollment in the South as a Percent of Total Black Enrollment
1952	63,000	---	63,000	13%	100%	70%
1960	84,000	3,000	81,000	10	96	50
1965	134,000	24,000	110,000	10	82	49

1976	426,000	243,000	183,000	15	43	41
1978	442,000	266,000	176,000	15	40	42
1980	461,000	287,000	174,000	15	38	42

Sources: Estimates of black student enrollment in predominantly white colleges and universities for the years 1960 and 1965 were taken from those made by the Southern Education Reporting Service. Black enrollments in 1952, 1960, 1965 was derived from Fall Enrollment Reports of the U.S. Office of Education. Estimates for 1970 were made from the U.S. Bureau of the Census, Current Population reports, and the U.S. Office for Civil Rights, Racial and Ethnic Enrollment in Higher Education, 1970. Figures for 1976, 1978, and 1980 are from the Fall Enrollment and Compliance Report of the Higher Education General Information Survey (HEGIS). Predominantly black institutions are those with greater than 50 percent black enrollment. See Appendix A for list.

Black Enrollment in Selected Fields

Black enrollment in selected fields for the United States in 1980 is summarized in Table M. The undergraduate, graduate, and first professional fields chosen for special enumeration by the National Center for Education Statistics are fields of particular interest in terms of minority participation. Nationally, black enrollment in the six undergraduate fields surveyed, as a proportion of total enrollment, was 7.9 percent in 1976, 8.2 percent in 1978, and 8.2 percent in 1980. In the 10 graduate and first professional fields surveyed, black enrollment, as a proportion of total enrollment, was 3.6 percent in 1976, 3.7 percent in 1978, and 3.8 percent in 1980.

In the SREB states, black enrollment in the six undergraduate fields surveyed, as a proportion of total enrollment, was 13.6 percent in 1976, 13.5 percent in 1978, and 13.9 percent in 1980. In the 10 graduate and first professional fields surveyed, black enrollment, as a proportion of total enrollment, was 4.8 percent in 1976, 4.9 percent in 1978, and 5.1 percent in 1980.

Business and management--with 15.3 percent of the black undergraduate enrollment--led among the undergraduate fields surveyed in the number of black students enrolled nationally. The largest increases in black undergraduate enrollment in the selected fields from 1976 to 1980 were in engineering, business and management, and architecture and environmental design, while black enrollment in the biological sciences declined. For the six undergraduate fields, only business and management had a higher proportion of blacks, compared to non-blacks, enrolled in 1980; in the other five fields blacks were underrepresented, compared to non-blacks.

In the graduate and first professional fields, business and management--enrolling 9.2 percent of the black students in graduate and first professional programs--had the highest enrollment in the surveyed fields nationally in 1980. Veterinary medicine, business and management, dentistry, engineering, and medicine had the greatest black

enrollment growth from 1976 to 1980; black enrollment in architecture and environmental design declined. Nationally, 4.6 percent of both the black and the non-black students at the graduate and first professional levels were enrolled in medicine in 1980; blacks were underrepresented, compared to non-blacks, in the other fields.

In the selected fields for the Southern region in 1980, business and management enrolled 17.4 percent of the black undergraduates. The largest increases in black undergraduate enrollment, from 1976 to 1980, occurred in architecture and environmental design, engineering, and business and management; black enrollment in the biological sciences declined. For the six undergraduate fields specified, only business and management had a higher proportion of blacks, compared to non-blacks, enrolled in 1980; in the other five fields blacks were underrepresented--the same pattern as in the United States.

In the graduate and first professional fields, business and management--enrolling 7.6 percent of the black students in graduate and first professional programs--had the highest enrollment in the selected fields for the SREB states. Black enrollment in veterinary medicine, engineering, physical sciences, dentistry, business and management, medicine, and agriculture and natural resources showed significant increases from 1976 to 1980, while architecture and environmental design and the biological sciences registered declines. For the South in 1980, blacks were underrepresented, compared to non-blacks, in all of the graduate and first professional fields.

Astin's analysis of minority enrollment by field found blacks underrepresented in the biological sciences, the physical sciences, mathematics, and engineering, particularly at the doctoral level. Minorities have been constrained by relatively poor quantitative preparation at the secondary school level and black students have tended to avoid majors in the physical sciences, mathematics, and engineering, while showing a strong preference for teacher education. Research on test score differences from the National Assessment of Education Progress data indicates that black teenagers

in high school have more difficulty with mathematics than other subjects.

The 1980 enrollment data suggest that black students are job-oriented in their choice of fields of study. Business and management and engineering have registered substantial enrollment increases from 1976 to 1980. A shift from traditional graduate studies to more career-oriented graduate and first professional fields also indicates an awareness of career opportunities.

Trends In Hispanic Enrollment

Hispanic enrollment in higher education has been growing steadily for several years. Hispanic enrollment in the United States and its territories, which totaled 480,000 in 1976, grew to 600,000 in 1980, an increase of 26 percent (Table N).

Table N

HISPANIC ENROLLMENT BY ENROLLMENT STATUS, 1976, 1978, 1980; PERCENT CHANGE 1976-1978, 1978-1980, UNITED STATES AND SREB STATES

	1976	1978	1980	Percent Change 1976-1978	Percent Change 1978-1980
United States					
Full-Time	288,747	319,186	350,384	10.5%	9.8%
Part-Time	191,050	222,084	251,763	16.2	13.4
Total	479,797	541,270	602,147	12.8	11.2
FTE	354,468	395,583	435,990	11.6	10.5
SREB States					
Full-Time	58,048	63,715	72,607	9.8	14.0
Part-Time	40,771	52,155	58,328	27.9	11.8
Total	98,819	115,870	130,935	17.3	13.0
FTE	72,073	81,656	92,672	13.3	13.5

Part-time Hispanic enrollment grew faster than full-time for the 1976-1980 period. Full-time-equivalent (FTE) Hispanic enrollment grew at a slightly slower pace than total Hispanic enrollment. Hispanic enrollment growth was greater than total enrollment growth, especially in the 1976-1978 period (Tables A and N).

In the SREB states, Hispanic enrollment expanded from 99,000 in 1976 to 131,000 in 1980, a growth rate of 32 percent. Part-time Hispanic enrollment increased more rapidly than full-time enrollment from 1976 to 1978; from 1978 to 1980, the situation reversed. FTE Hispanic enrollment increased at a steady 13 percent rate in 1976-1978 and 1978-1980. Hispanic enrollment grew at a much greater rate in the SREB states than total enrollment.

For the United States and its territories, undergraduate, first professional, and graduate Hispanic enrollment showed significant gains from 1976 to 1980 (Table O). Hispanic enrollment growth far exceeded total and black enrollment gains from 1976 to 1978; Hispanic first professional enrollment showed the same jump in 1978-1980 that black first professional enrollment did (Tables B, I, and O).

Table O

Hispanic enrollment in the Southern region expanded considerably from 1976 to 1978, compared to total and black enrollment, especially at the first professional level.

The enrollment and population data in Table P show that among the 14 SREB states only Florida and Texas have substantial Hispanic enrollments and populations.

*The United States higher education enrollment statistics include data from institutions in the outlying areas. The United States population statistics on which this percentage is based have been adjusted to include total population and estimated Hispanic population data for the outlying areas.

Source: Michael M. Myers, Fact Book on Higher Education in the South 1981 and 1982 (Atlanta: Southern Regional Education Board, 1982).

Florida and Texas accounted for 25 and 65 percent, respectively, of the Hispanic enrollment in the 14 SREB states in 1980 (Table Q). Hispanic enrollment, from 1976 to 1980, increased 65 percent in Florida and 19 percent in Texas.

Table Q

Texas	71,604	78,954	85,551	10.3	8.4

*Includes outlying areas

The rapid growth in Hispanic enrollment reflects increases in the Hispanic population in the United States. On the mainland, the Hispanic population almost doubled between 1970 and 1980 and continues to grow rapidly. The Hispanic population is relatively young--the average age was 23.2 in 1980, compared to 30 for the whole population.

Institutional Perspectives

Nationally, about 44 percent of the Hispanics enrolled in higher education attended public two-year institutions in 1980 (Table R). Public four-year institutions and private four-year institutions enrolled 33 and 20 percent, respectively, of the college-going Hispanics. In the SREB states, public two-year colleges enrolled 50 percent of the Hispanic college students in the region in 1980, compared to 33 percent of all students; public four-year institutions and private four-year institutions enrolled 40 and 11 percent, respectively.

Table R

The high rate of enrollment of Hispanic students in community colleges is probably due to economic circumstances. Tuition and fees are relatively low at community colleges, and the students can live at home and commute. In addition, community colleges enrolling many Hispanic students often have special academic and support programs for these students.

Hispanic enrollment growth in public four-year and public two-year institutions from 1976 to 1980 averaged about 20 percent nationally and 30 percent in the South.

Private four-year institutions saw Hispanic enrollment increase over 60 percent nationally and about 35 percent in the Southern region.

In the continental United States, 15 institutions of higher education were predominantly Hispanic in 1980 (Appendix B). Of these 15 institutions, three are public four-year, nine are public two-year, and three are private four-year institutions. Seven of these institutions are located in Texas.

Astin asserts that Hispanics often do not complete a four-year college program because they generally start out in community colleges. When the representation of minorities among undergraduates at 65 state flagship universities was assessed, Astin found that Hispanics were overrepresented at nine institutions, proportionately represented at eight, and underrepresented at 48.

Hispanic Enrollment in Selected Fields

Hispanic enrollment in selected fields for the United States in 1980 is summarized in Table S. The undergraduate, first professional, and graduate fields chosen for special enumeration by the National Center for Education Statistics are fields of special interest in terms of minority participation. Nationally, Hispanic enrollment in the six undergraduate fields surveyed, as a proportion of total enrollment, was 3.9 percent in 1976, 4.6 percent in 1978, and 5 percent in 1980. In the 10 graduate and first professional fields surveyed, Hispanic enrollment, as a proportion of total enrollment, was 1.9 percent in 1976, 2.1 percent in 1978, and 2.5 per cent in 1980.

In the SREB states, Hispanic enrollment in the six undergraduate fields surveyed, as a proportion of total enrollment, was 3.3 percent in 1976, 3.4 percent in 1978, and 4.5 percent in 1980. In the 10 graduate and first professional fields, Hispanic enrollment, as a proportion of total enrollment, was 1.7 percent in 1976, 2.0 percent in 1978, and 2.4 percent in 1980.

Business and management--with 14.9 percent of Hispanic undergraduate enrollment--led among the undergraduate fields surveyed in the number of Hispanic

students enrolled nationally. The biological sciences, business and management, the physical sciences, and engineering had the highest growth rates in enrollment from 1976 to 1980 among the selected fields. For the six undergraduate fields, the biological sciences and business and management had relatively more Hispanic than non-Hispanic students enrolled in 1980; Hispanic students were underrepresented in the other fields.

In the graduate and first professional fields, business and management--enrolling 9.1 percent of the Hispanic students in graduate and first professional programs--had the highest enrollment in the selected fields for the United States. Veterinary medicine, medicine, business and management, agriculture and natural resources, the biological sciences, dentistry, and the physical sciences were the surveyed graduate and first professional fields with the greatest Hispanic enrollment growth from 1976 to 1980. Nationally, relatively more Hispanic than non-Hispanic graduate and first professional students were enrolled in dentistry, medicine, and law in 1980; Hispanic students were underrepresented in the other fields.

In the SREB states, business and management enrolled 13.9 percent of the Hispanic undergraduates in 1980. The largest increases from 1976 to 1980 in Hispanic undergraduate enrollment in the surveyed fields occurred in engineering, architecture and environmental design, agriculture and natural resources, and business and management. For the six undergraduate fields specified, architecture and environmental design and the biological sciences had an equal or higher proportion of Hispanics, compared to non-Hispanics, enrolled in 1980; in the other four fields Hispanics were underrepresented.

The graduate field of business and management--enrolling 11 percent of the Hispanic students in graduate and first professional programs--had the highest enrollment in the surveyed fields for the Southern region. Hispanic enrollment in veterinary medicine, agriculture and natural resources, medicine, dentistry, business and management, and the biological sciences showed significant increases from 1976 to 1980.

For the South in 1980, relatively more Hispanic students, compared to non-Hispanic students, were enrolled in architecture and environment design, medicine, and law; Hispanics were underrepresented in the other graduate and first professional fields.

Conclusion

Economic realities, educational trends, and perceptions of the future affect students and their preferences in higher education. Enrollment data show that part-time students are enrolling in greater numbers than full-time students. First professional enrollment is growing slightly faster than undergraduate enrollment, and much faster than graduate enrollment. Two-year institutions are attracting relatively more students than four-year institutions--by appealing to nontraditional students and because of cost considerations. Enrollment at public four-year institutions, which are usually attended by traditional, 18-to-24 year-old full-time students, is growing more slowly than at other types of institutions. Shifts in enrollment to engineering and business and management programs by career-oriented students who foresee a tight job market after graduation are widespread.

Recent trends indicate that black enrollment growth is slowing, while Hispanic enrollment continues to expand rapidly. Economic conditions may account for some of the slowdown in black enrollment. The significant increases in the Hispanic population have spurred Hispanic enrollment gains. Black and Hispanic students are increasingly attending two-year colleges.

The educational marketplace is indeed a "buyer's market." Traditional students are increasingly choosing academic programs that may lead to job opportunities after graduation. Nontraditional students commute to colleges offering courses and programs that are geared to their goals, interests, and schedules. A general decline in enrollment has not yet materialized, due in part to colleges and universities responding to current economic and social conditions.
